

# USER GUIDE

**TJM FLEX-FLARE**

**TAKE THE LEAD.**

    TJM4x4 | [www.tjm.com.au](http://www.tjm.com.au)

**TJM**  
4X4 EQUIPPED

## VEHICLE APPLICATIONS

2 wheel arch sets available in each size (comes in a three metre length for each pair of wheel arches).

## PRODUCT TIPS

- Use Wiss hand cutters or a sharp snap off type knife to shape ends of your flares.
- Spray with industrial lubricant before inserting the spring wire.
- Use rubber protectant or similar for the best looking finish and protection for your TJM Flex-Flares.
- When positioning screws to fasten your TJM Flex-Flares to the guard, compress the flare rather than stretch it between attachments points. This will give your flares an even, rounded and smooth finish.
- Only available in black - Surface not suitable for painting.

## SAFETY PRECAUTIONS

- Follow fitting instructions closely - always jack up the vehicle safely if you need to remove the wheel before starting TJM Flex-Flare installation.

### **35mm | TJM Flex-Flare**

PN. 265RUBFL3MCAB

### **65mm | TJM Flex-Flare**

PN. 265RUBFL3MAAB

## FEATURES

**35mm or 65mm width choices**

**Durable rubber construction**

**Provides protection**

**Easy do-it-yourself fitment**

## BENEFITS

Suits most vehicle applications

Resistant to cracks, splits or scratches even when bumped or scraped

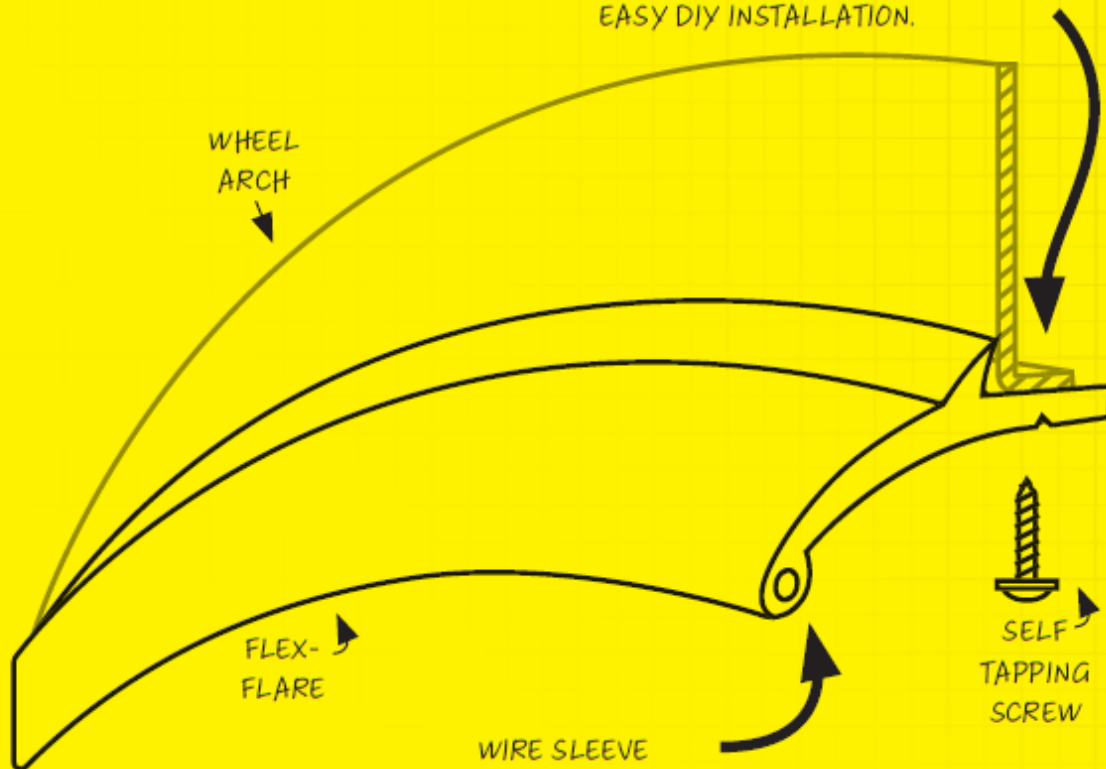

Helps protect paint-work from road grime, stones, sand and mud thrown up by the tyres

Instructions shown to the right

GROOVE IN RUBBER

THIS GUIDING GROOVE SERVES AS A POINT OF REFERENCE FOR THE PLACEMENT OF SCREWS FOR EASY DIY INSTALLATION.

TO INCREASE THE RIGIDITY OF YOUR FLEX-FLARE (AND THE PROTECTION IT PROVIDES), A PRE-FORMED HOLE HAS BEEN EXTRUDED INTO THE SIDE OF THE FLARE, FOR EASY INSERTION OF THE PROVIDED STIFFENING WIRE.

NOTE | SPRAY WITH INDUSTRIAL LUBRICANT BEFORE INSERTING
