i

ii

## STEP 8

Connect rods as shown.

STEP 9

Connect the wiring to the actuator then route the actuator wiring harness (1) out of the tailgate and underneath the vehicle following the existing vehicle harness.
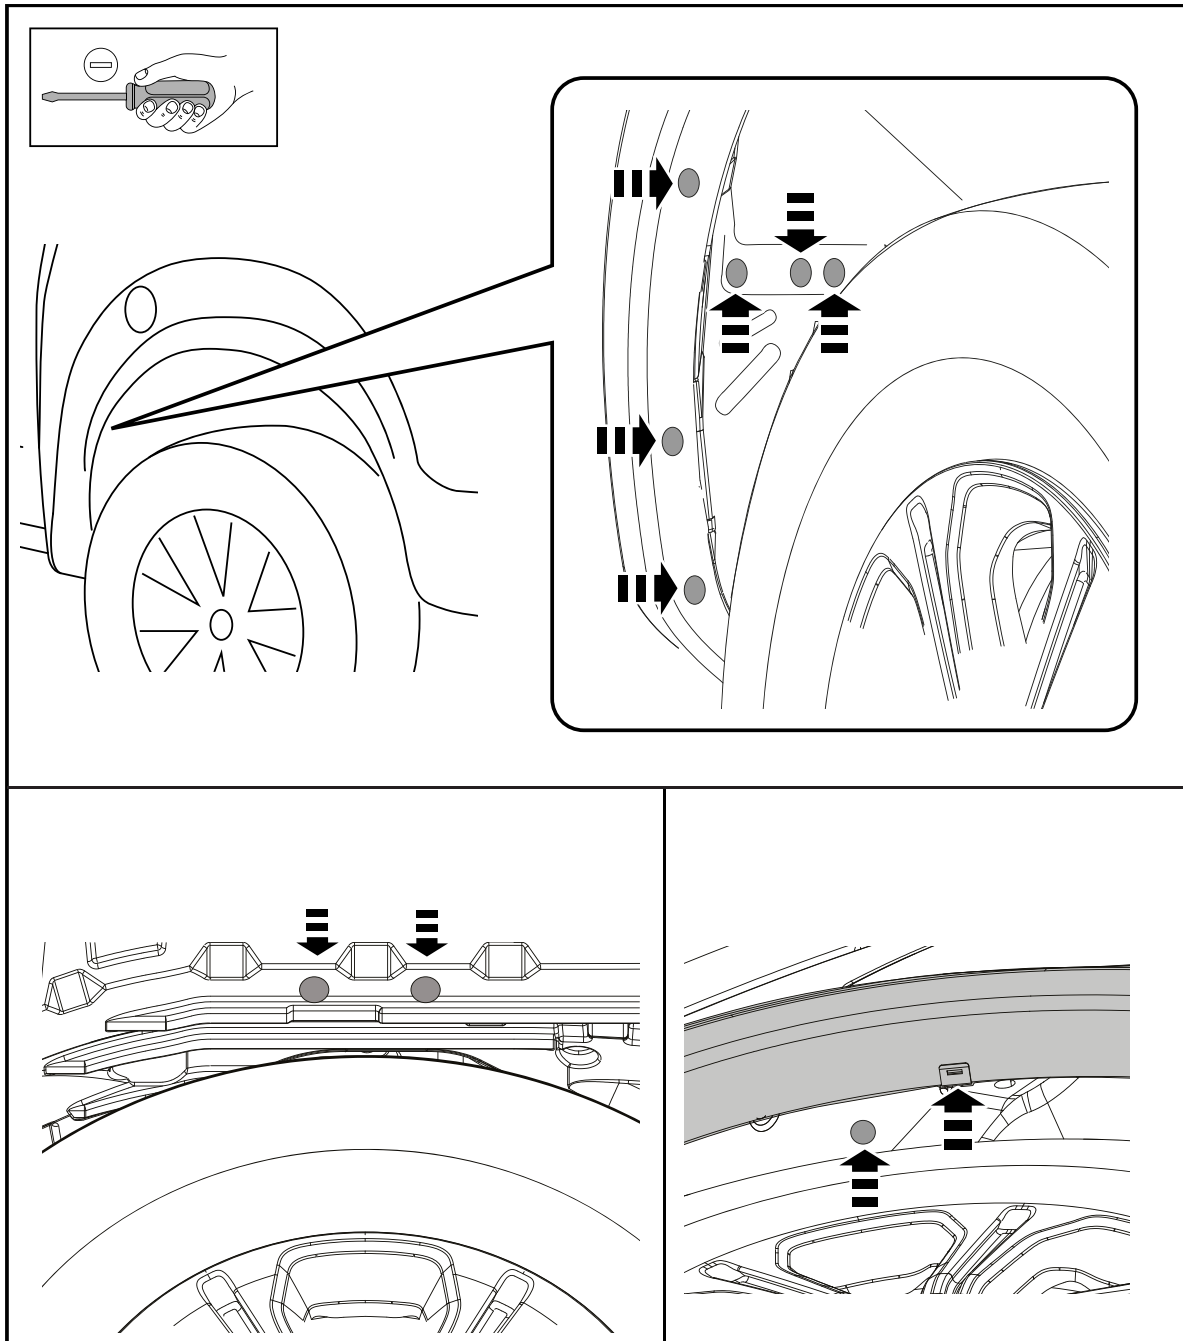

STEP 10

Run wiring from tailgate to fuel cap.

— STEP II —

Remove the retain the 6x wheel arch liner scrivets at the front and top of the LH rear wheel well. If the vehicle is fitted with fender flares, remove and retain the forward 3xFF scrivets and 1xFF clip at the top from the LH rear wheel FF. Pull Back the wheel arch liner to get access to the fuel flap harness connectors.
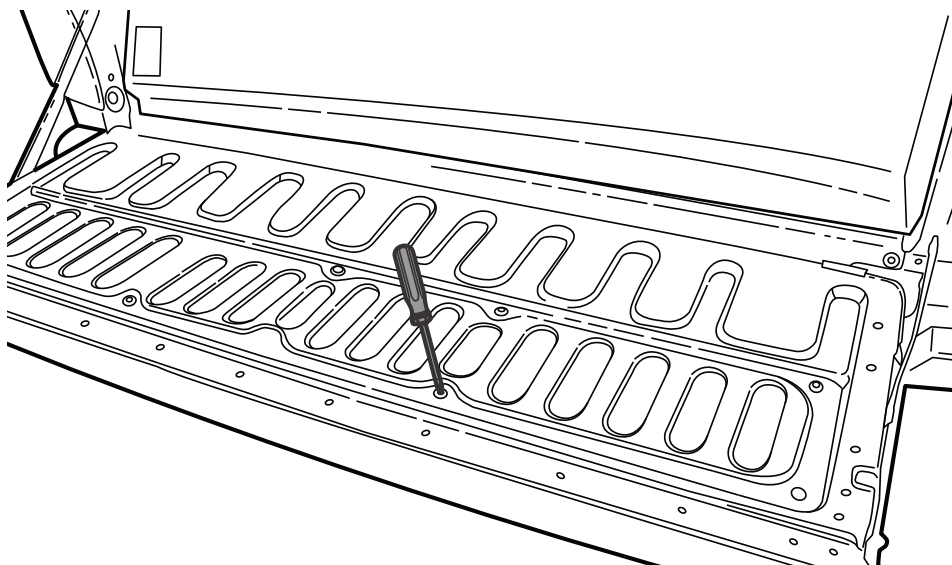

STEP 12

Disconnect the fuel flap connector (1). Patch the shorter (two grey connectors) between the two fuel flap connectors.

Use one zip tie to secures the harness to the existing harness.
