

SKYCAMP MINI

- 1-MINUTE SETUP
- EXPANDABLE
- FITS ON MOST VEHICLES
- SLEEPS UP TO 2 PEOPLE

UNBEATABLE QUALITY

Made with utmost care in our own factory, we assemble every Skycamp Mini ourselves and the product is certified to the highest international standards, with ISO 9001 (Quality Management) and ISO 14001 (Environmental Management) certification.

The Skycamp Mini's fast, easy set up is only possible because of the careful design and the quality of every part. We've spent years perfecting the Skycamp's folding design to create a comfy tent that literally anyone can set up.

AERODYNAMIC, DOUBLE-LAYERED HARD SHELL

The hard shell of the Skycamp Mini is made of FRP (fibre-reinforced plastic) and has a double layer with built-in air insulation, making it soundproof and condensation resistant. Most rooftop tents have a single-layer shell, setting it apart from traditional roof top tents' shells.

DURABLE HONEYCOMB ALUMINUM FLOORING

The Skycamp Mini's floor is made of high-performance honeycomb aluminium panels that are lightweight and strong enough to hold a 1.8-ton Jeep Wrangler! The flat, insulated aluminium panels will give you a much more comfortable night's rest than the rocky, cold ground.

300GSM POLY-COTTON CANVAS

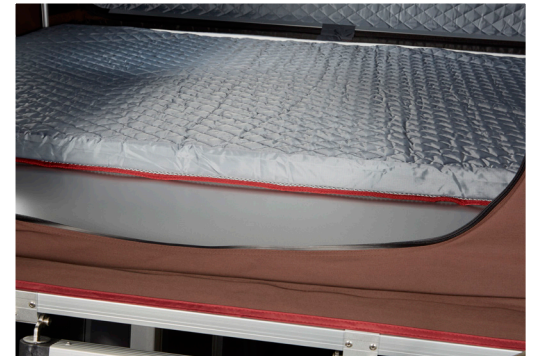

The Skycamp Mini tent is made of breathable, water-resistant poly-cotton canvas. To really keep you dry, it also comes with waterproof zippers and a rain fly for extra protection. The problem with most tents is that the thin polyester has a vinyl coating, making it less breathable and increasing condensation. The Skycamp's thicker, heavier canvas will keep you dry, and it's also quieter in the wind.

DETACHABLE TENT

The tent "skin" is just one part of the Skycamp Mini. It's completely detachable, allowing you to switch it out with our lighter mesh tent in summer or replace the tent after a few years without having to buy a whole new Skycamp.

Skycamp Mini opens to a comfy double size mattress.

5cm Super High Density Memory Foam mattress.

Weighing in at only 57kg (125lbs), the Skycamp Mini can fit on most vehicles: compact cars as well as short bed or truck cabs.

SKYCAMP MINI SPECIFICATIONS:

Closed:	145 x 138 x 32cm
Open:	145 x 210 x 115cm
Mattress:	128 x 205 x 5cm
Ladder Length:	Standard: 230cm Long: 260cm XL Add-On: 290cm
Choose ladder length based on the height of your roof rack/cross bars:	Height up to 211cm: Standard Height up to 239cm: Long Height up to 268cm: XL Add-On

THE WISE CHOICE

There's a reason why the Skycamp became the most successful tent project on Kickstarter, raising \$2.3 million and shipping to 46 countries within 6 months of starting production.

It took years of hard work, prototypes, testing, failing, re-testing... But finally, we did it. We believe you'll be as proud of owning your Skycamp as we are of creating it.
