# Uniden® XTRAK

## UHF HANDHELD AND ADVANCED TRACKING IN 1

The XTRAK 50 Pro handheld UHF radio is App enabled – giving you the ability to location track on your radio through the XTRAK Bluetooth App.

Talk to a friend or colleague and know exactly where they are, by using the App's advanced positional tracking and location sharing features as part of the XTRAK App on your smartphone when connected to your UHF Radio.

With the XTRAK 50 Pro, you'll never be out of contact and always be able to communicate and establish your exact position, as Uniden's location tracking ensures locations are accurate.

To share location information provided by the App the XTRAK Pro radios must be within UHF CB range of each other.

# APP ENABLED

## Location Tracking

Pairing the XTRAK Pro models with the Bluetooth XTRAK App, available for iOS and Android, is simple and immediately enables advanced positional tracking and location sharing with the UHF radio.

The App also gives you access to settings controls on the radio, allows you to manage Selcall (mobile only) contacts and extra receive channels, as well as sending in-App text messages.

### Bluetooth XTRAK Pro App<sup>2</sup>:

- Advanced Positional Tracking and Location sharing
- Manage Radio Settings, Selcall Contacts and Extra Receive Channels
- Repeater Find
- Send basic in-App text messages
- XTRAK Pro products are software upgradable via the app, keeping users up-to-date with the latest features and technology

### Bluetooth Audio<sup>3</sup>:

- Connect to vehicle speakers or compatible Bluetooth headset.

# Uniden® XTRAK

A close-up, slightly blurred photograph of the interior of a boat's cabin. The view is from the driver's perspective, looking out through the windshield. The steering wheel is visible in the center, and the dashboard and control panel are on the left. The background shows a bright blue sky and a body of water with white-capped waves. The overall tone is bright and clear, suggesting a sunny day.
